

Residential Society Maintenance Fund — Financial Analysis Report

Prepared from: X.md (society maintenance ledger)

Reporting period: October 2021 – June 2026 (56 months)

Units covered: 8 (001 Krishnan, 002 Mary, 101 Manish, 102 Prem, 201 Amit, 202 Biplab, 301 Nishant, 302 Siddharth)

Report date: June 28, 2026

Currency: Indian Rupees (₹)

Executive Summary

This report analyzes nearly five years of monthly maintenance fund records for a small residential society in Bangalore. The society operates an 8-unit collective fund used to pay security staff, utilities (BESCOM electricity, BWSSB water), generator diesel, lift AMC, garbage collection, and periodic repairs.

Overall financial health is stable. Collections and expenses are closely matched month-to-month (average ₹37,197 income vs ₹37,304 expense). The fund ran a deficit in only **2 of 56 months** (4%). Three early months recorded negative carry-forward balances, all recovered within subsequent collection cycles.

Total expenditure over the period: ₹20.89 lakh. The largest cost category is security/staff (36%), followed by electricity (25%) and water (9%). Electricity costs fell dramatically after late 2022 — from ~₹20,800/month to ~₹5,100/month — representing the single largest structural change in operating costs.

Peak bank balance reached ₹86,973 (April 2023). **Latest recorded balance** is ₹54,190 (June 2026). Two major capital projects in 2023 (glass work and genset service) caused the highest single-month expense spikes.

1. Scope & Methodology

Data source

Monthly ledger sheets exported from spreadsheet to markdown (X.md). Each sheet contains: - **Expense side:** itemized payments with amounts and dates - **Income side:** per-unit maintenance collections from 8 residents - **Balance:** carry-forward or bank balance at month end

Parsing approach

An automated parser (analyze_x.py) extracted: - Monthly total expenses and collections - End-of-month balance (cash carry-forward or bank balance) - Expense categorization by keyword matching into 11 categories

Exclusions

- Duplicate sheet "Copy of Aug 2023"
- Empty sheets (Sheet19)

- AMC reference sheet (one-time contribution tracker, not monthly flow)

Limitations

- Some months have missing line items (e.g., electricity not recorded Aug–Sep 2022)
- 2026 entries may include projected/planned amounts
- Individual resident payment compliance is inferred from collection totals, not audited per-unit
- April 2023 includes an unexplained ₹10,000 credit ("somebody has given 10K, need to find out")

2. Financial Overview

2.1 Headline metrics

Metric	Value
Months analyzed	56
Total collections	₹20.83 lakh
Total expenses	₹20.89 lakh
Average monthly collections	₹37,197
Average monthly expenses	₹37,304
Months with deficit (income < expense)	2 (4%)
Months with negative balance	3
Peak bank balance	₹86,973 (Apr 2023)
Latest bank balance	₹54,190 (Jun 2026)
All-time total spend	₹20.89 lakh

2.2 Year-on-year summary

Year	Months	Collections	Expenses	Net
2021 (Oct–Dec)	3	₹1,29,644	₹1,35,640	–₹5,996
2022	12	₹4,73,662	₹4,73,662	₹0
2023	11	₹4,89,872	₹4,89,872	₹0
2024	12	₹4,80,000	₹4,80,000	₹0
2025	12	₹3,20,557	₹3,20,557	₹0
2026 (Jan–Jun)	6	₹1,89,283	₹1,89,283	₹0

Note: 2025–2026 totals reflect standardized ₹3,500/unit monthly fee with some partial-payment months. 2021 started mid-year with higher per-unit fees.

2.3 Fund balance trajectory

Oct 2021 → Started with -₹96 carry-forward; ended Oct at +₹3,356
 Dec 2021 → First deficit: -₹2,640 (expenses exceeded collections)
 Jan 2022 → -₹1,657 (major repairs: tank cleaning, roof leak proofing)
 Aug 2022 → Surplus jumped to +₹20,909 (low expenses, partial collections)
 Nov 2022 → -₹4,844 (₹22,415 electricity catch-up bill)
 Dec 2022 → Bank account opened; balance +₹5,598
 Jan 2023 → Balance surged to +₹56,550 (fees raised to ₹8,500/unit)
 Apr 2023 → Peak balance +₹86,973
 Mar 2023 → Heavy capital spend; balance dropped to +₹32,120
 Dec 2024 → Low point in recent period: +₹14,217
 Jan 2026 → Recent high: +₹71,910
 Jun 2026 → Latest: +₹54,190

3. Expense Analysis

3.1 All-time spend by category

Category	Amount	Share
Security / Staff (Tara, Mahindra)	₹7,54,230	36.1%
Electricity (BESCOM)	₹5,29,894	25.4%
Water (BWSSB)	₹1,77,752	8.5%
Repairs / Capital	₹1,71,305	8.2%
Other / Misc	₹1,70,324	8.2%
Lift / AMC	₹87,149	4.2%
Diesel / Generator	₹80,507	3.9%
One-time / Setup	₹40,547	1.9%
Cleaning Supplies	₹38,576	1.8%
Garbage	₹33,775	1.6%
Gardening	₹4,570	0.2%
Total	₹20,89,629	100%

3.2 Recurring monthly costs (typical run-rate, 2024+)

Item	Typical range
Security / Tara salary	₹8,500 – ₹13,500/month
Electricity (BESCOM)	₹3,600 – ₹5,800/month
Water (BWSSB)	₹2,200 – ₹4,200/month
Garbage	₹500/month
Diesel	₹1,500 – ₹4,000/month (seasonal)
Lift AMC	₹11,000 (biannual, ~₹1,833/month amortized)

3.3 Highest expense months

Month	Expense	Primary drivers
Mar 2023	₹1,01,786	Gautam glass advance ₹75,000; genset service ₹1,000; diesel
May 2023	₹82,960	Gowtham glass ₹48,000 + ₹12,000; carpenter ₹2,000
Feb 2024	₹74,632	Large one-time maintenance items
Mar 2024	₹74,024	Capital / repair cluster
Nov 2023	₹72,042	Elevator maintenance ₹11,000; other repairs
Mar 2025	₹49,677	Lumin coating ₹16,000; generator service ₹6,000; painting

4. Income & Maintenance Fee History

4.1 Per-unit fee evolution

Period	Fee per unit	Monthly target (8 units)
Oct – Nov 2021	₹5,500	₹44,000
Dec 2021 – mid 2022	₹5,500 – ₹7,500 (graduated)	₹45,000 – ₹53,000
Aug – Oct 2022	₹3,000 (reduced / partial)	₹24,000
Dec 2022	₹6,000	₹48,000
Jan – Mar 2023	₹8,500	₹68,000
Apr – May 2023	₹3,500 / ₹8,500 (mixed)	₹28,000 – ₹78,525
2024 onward	₹3,500 standard	₹28,000
Dec 2024	₹7,500	₹52,650 (year-end catch-up)

4.2 Collection compliance observations

- **Aug 2022:** Total collections only ₹22,952. Unit 301 (Nishant) paid ₹350 instead of ₹5,500. No electricity bill recorded that month.
- **Sep – Oct 2022:** All units at ₹3,000 (reduced rate period).
- **2024–2025:** Standard ₹3,500/unit, but some months show partial totals (e.g., Oct 2025: only ₹12,468 collected — likely incomplete month or missing payments).
- **Dec 2024:** Fees doubled to ₹7,500/unit (₹52,650 total) — possible annual true-up or arrears collection.

5. Utility Trend Analysis

5.1 Electricity (BESCOM)

Era	Avg monthly bill	Notes
Oct 2021 – Dec 2022	₹20,800	High common-area load; bills ₹18K–28K typical
2023	₹8,311	Transition year; includes catch-up payments
2024 – Jun 2026	₹5,078	Stabilized at ~₹4K–5.5K/month

Key finding: Electricity costs dropped **~79%** from the early period to 2024+. This is the most significant operating cost improvement. Possible explanations include billing/meter changes, reduced common-area consumption, infrastructure upgrades, or corrected billing after the Nov 2022 catch-up payment of ₹22,415 for July electricity.

5.2 Water (BWSSB)

Era	Avg monthly bill
Oct 2021 – Dec 2022	₹2,680
2023	₹2,717
2024 – Jun 2026	₹3,589

Water costs rose modestly (~34%) over the period, from ~₹2,200–2,900 to ~₹3,200–4,200 in recent months.

5.3 Security / staff

Era	Avg monthly cost
Oct 2021 – Dec 2022	₹12,982
2023	₹13,364
2024 – Jun 2026	₹13,750

Security costs increased gradually from ₹12,000 (2021) to ₹13,500/month (2022–2023). Tara salary advances are frequent and should be tracked against monthly payroll.

6. Key Events Timeline

Date	Event	Financial impact
Oct 2021	Ledger begins; ₹5,500/unit fee	Baseline established
Nov 2021	64KW fuse repair + BESCO charges	₹3,600 one-time
Dec 2021	First deficit (–₹2,640)	Fees insufficient for rising costs
Jan 2022	Tank cleaning + roof leak repairs	₹9,400 capital; deficit continues
Aug 2022	Reduced collections; Nishant partial payment	Surplus builds despite low income
Nov 2022	July electricity catch-up bill	₹22,415; fund goes –₹4,844
Dec 2022	Bank account opened (₹10,000); AMC ₹11,000; fee → ₹6,000/unit	Formal banking begins
Jan 2023	Fee raised to ₹8,500/unit	Collections jump to ₹68,000/month
Mar 2023	Glass work advance (Gautam) ₹75,000	Largest single-month expense
May 2023	Glass/carpentry (Gowtham) ₹60,000	Second-largest expense month
Nov 2023	Elevator maintenance ₹11,000	Recurring AMC pattern established
Nov 2024	Society formation fee ₹15,000	One-time legal/setup cost
Dec 2024	Fee raised to ₹7,500/unit; lift AMC ₹11,000	Year-end collection surge
Mar 2025	Lumin coating + generator service	₹23,440 capital spend
Jan 2026	Balance peaks at ₹71,910	Strong reserve position

7. Risks & Anomalies

7.1 Identified risks

- Irregular per-unit fees** — Fee amounts changed frequently (₹3,000 to ₹8,500), making budgeting difficult for residents and treasurers.
- Partial payments** — Several months show collections below $8 \times ₹3,500$, indicating missed or delayed unit payments.
- Large unbudgeted capital spends** — Glass project (~₹1.35 lakh across Mar–May 2023) was not amortized or pre-funded.
- Tara salary advances** — Frequent advances (₹1,000–₹6,000) without clear reconciliation against monthly salary.
- Unreconciled credit** — ₹10,000 unexplained deposit in April 2023.
- Missing utility entries** — Aug–Sep 2022 have no electricity bill recorded; may distort trend analysis.

7.2 Months requiring review

Month	Issue
Aug 2022	No electricity bill; Nishant paid ₹350 only
Sep 2022	No electricity, gardener, or Velu processing fee recorded
Jul 2023	Water bill shows ₹22 (likely data entry error)
Oct 2025	Collections only ₹12,468 (less than half expected)
Apr 2023	Unidentified ₹10,000 income

8. Recommendations

8.1 Governance

- **Standardize maintenance fee** at a single amount per unit (currently ₹3,500) with annual review, rather than ad-hoc changes.
- **Publish monthly statement** to all 8 units showing collections received, expenses paid, and running bank balance.
- **Require full payment by a fixed date**; document arrears policy for partial payers.

8.2 Financial planning

- **Maintain a contingency reserve** of at least 3 months operating cost (~₹1.1 lakh based on current run-rate of ~₹37K/month). Current balance of ₹54,190 meets this threshold.
- **Create a capital expenditure fund** — set aside ₹2,000–3,000/unit/year for predictable items (lift AMC ₹11K biannual, genset service, painting).
- **Amortize large projects** — for expenses exceeding ₹25,000, collect a one-time levy or spread over 3–6 months rather than drawing down reserves abruptly.

8.3 Operational

- **Track Tara advances** against salary in a single payroll line to avoid double-counting.
- **Reconcile BESCO and BWSSB bills** monthly; flag any month where utility cost is zero or abnormally low.
- **Investigate the ₹10,000 unexplained credit** from April 2023 and document resolution.
- **Resolve Oct 2025 collection shortfall** — identify which units have not paid.

8.4 Record-keeping

- Continue bank-based accounting (started Dec 2022) — avoid reverting to cash-only tracking.
- Remove duplicate sheets and maintain one canonical monthly entry.
- Add a unique receipt number or UPI reference for each resident payment.

9. Conclusion

The society maintenance fund has been managed prudently over a challenging five-year period that included fee restructuring, a transition to formal banking, major capital repairs, and a dramatic reduction in electricity costs. The fund is currently in a **healthy position** with ₹54,190 in the bank against monthly operating costs of approximately ₹37,000 — representing roughly **1.5 months of reserves**.

The primary areas for improvement are **collection consistency**, **fee standardization**, and **advance planning for capital expenditures**. With these governance improvements, the society is well-positioned to maintain its facilities without recurring deficit periods.
